# Resident / Family Education Myths and Truths about UTI's (Urinary Tract Infections)

Myth: Urine that has a strong smell or is cloudy means a UTI.

Truth: Colour, clarity and smell of urine can be affected by diet, medications and decreased fluid intake.

Myth: When a resident has sudden falls or mental status change this indicates that resident has a urinary tract infection.

Truth: Falls and mental health changes in asymptomatic residents should be investigated for other causes. This could be a progression of their diagnosis, like Dementia or Parkinson's. It could also be a sign of dehydration or bowel issues.

Myth: All urine should be bacteria free.

Truth: Bacteria in urine is common in the elderly. The cause for concern is if the resident has symptoms of an infection like a fever or bursing sensation while peeing.
