

NATIONAL VOLUNTEER WEEK 2025

VOLUNTEERS MAKE WAVES

APRIL 27 - MAY 3

Thank you to all volunteers. Your time and commitment is greatly appreciated.

If anyone is interested in seeking a volunteer opportunity, please contact Nicole Hopper, Activity Director at 519-693-4415.

Infection Prevention & Control

Please find enclosed an information sheet on Asymptomatic Bacterium. Thank you.

APRIL 2025

BABCOCK
COMMUNITY CARE CENTRE

HAPPY NOTES!

Happy Birthday

- Connie Peterkin - April 2
- John Keskeny - April 9
- Anita Kendall - April 12

Welcome

We would like to welcome Elaine Conway, Bill Harper and Don Gowanlock to our home.

Resident Council & Food Committee Meeting

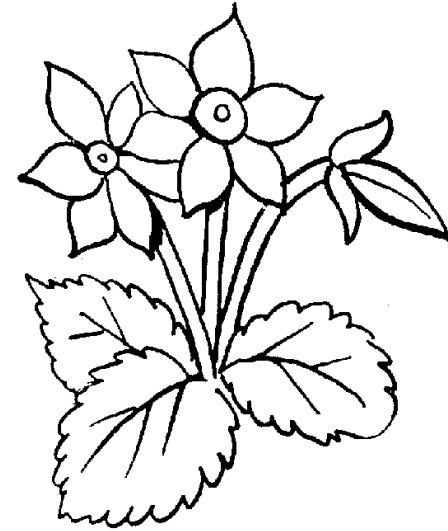

Thursday, April 17th
Starting at 9:30 AM

All residents are welcome to attend!

Poke A Flower

Thursday, April 24th at 1:30 PM

Pizza & Wing Night

Monday, April 28th at 5:00 PM

Monthly Birthday Party

Thursday, April 3rd

1:30 PM – Randy Grey Entertains

2:00 PM – Birthday Cake

Friday, April 18th

10:15 AM – Hot Cross Buns

1:45 PM – Jelly Bean Game

6:00 PM – Fast Bunny Races

Wal-Mart Outing

Tuesday, April 22nd @ 9:45 AM
Volunteers needed to assist us!

From everyone at Babcock's!

Sunday, April 20th

Easter Egg Hunt & Cupcakes

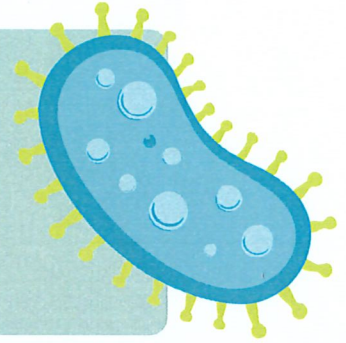

at 1:30 PM

Facts about Asymptomatic Bacteriuria

What is Asymptomatic Bacteriuria?

Asymptomatic bacteriuria is the presence of bacteria in the urine (a positive urine culture) without the signs and symptoms of a urinary tract infection. It is common for the elderly to have bacteria in their urine.

Why do some residents have asymptomatic bacteriuria?

Age-related factors and medical conditions are associated with asymptomatic bacteriuria. Diabetes, pelvic prolapse or cystocele, enlarged prostate, vaginal atrophy, immobility, incontinence and dehydration may all contribute to asymptomatic bacteriuria.

Should asymptomatic bacteriuria be treated with antibiotics?

No. Antibiotics are not required. It is not an infection. Treatment of asymptomatic bacteriuria does not improve or prevent incontinence, prevent symptomatic UTIs from developing or have any other benefits. Harms have been seen in residents who are given antibiotics for asymptomatic bacteriuria.

What are the risks associated with treating asymptomatic bacteriuria with antibiotics?

It can put the resident at unnecessary risk for antibiotic side effects (e.g., gastrointestinal, neurologic, renal), allergic reactions, Clostridioides (previously Clostridium) difficile infection and drug interactions. Unnecessary use of antibiotics also promotes antimicrobial resistance, so that fewer antibiotics are available to treat true infections.

April 2025

Calendar may change. Please give us a call at 519-693-4415 if you have any questions.

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
